

12th Dec 2007

Dear Sir / Madam

I am writing to you in regards to an unusual aerial observation that I witnessed on Saturday the 20th October 2007 at 12.10 pm above my fathers home, which is situated on the outskirts of Portsmouth below portsmouth hill. Just after midday at 12.10 pm I observed from my fathers back garden an unusual oval / spherical shaped object that appeared to cross the flight path of a commercial aircraft, narrowly missing it, as the oval / spherical object approached the aircraft it appeared to accelerate very fast, in doing so it appeared to wobble from side to side as it passed directly in front of the commercial aircraft narrowly avoiding a collision, I briefly watched the object move off to the east before deciding to rush back in to my fathers home to retrieve my camcorder, but unfortunately when I returned to the garden the object was no longer visible, (see drawing enclosed, Attachment 1) However within 2 minutes I sighted & managed to film on my camcorder another object in the sky roughly in the same vicinity as the previous occurrence that I couldn't identify (see pictures enclosed, Attachment 2) the object remained virtually stationary throughout the duration of 10 minutes until it finally disappeared in to the clouds.

Mr Alain Hubrecht who is a Belgium national and a "NATO expert in peace support operations and critical infrastructure protection" wrote on my behalf to Airprox concerning this incident, Airprox passed on the information to the CAA (see enclosed; Mr Hubrecht's initial request to Airprox (Attachment 3) and the CAA's reply back to Mr Hubrecht concerning the radar data, Attachment 4). Mr Hubrecht has asked if he could communicate with you directly concerning this incident,
Is this possible?

I would be grateful for your help in this matter.

Yours sincerely

Section 40
