

Subject: UFO sighting - Derbyshire

Attachments: ufo 001.jpg; ufo 002.jpg; ufo 003.jpg; ufo 004.jpg

Hi,

I'm sure you must get so many reports of UFOs, but I thought you might be interested in my experience tonight.

I can't quite believe what I saw tonight, but it made me rush out onto the street camera in hand.

I was very sober when I saw what I am about to describe. Until recently I was a journalist and we used to get similar stories like this from time to time which we would all have a good laugh at (not any more!)

I was sitting on the couch when I saw an orange light in the sky. My initial thoughts were 'that plane is flying low' and I went back to watching TV.

However, five/ten minutes or so later I couldn't believe it when I saw several orange lights - about the same colour and brightness of street lights - about half a dozen in total.

Three of them were closer together than the others and were in a straight, but horizontal line.

I shouted upstairs to my boyfriend, who also witnessed the incident.

I then told him I was getting the camera before running outside - with no shoes on! (the neighbours must think I'm mad).

Unfortunately my camera is not great, but I have attached the pictures anyway in the hope you can enhance them. On the one marked UFO 001 you can see a round shape, which was not visible to the naked eye and only appeared when I blew up the photo. I believe it may show the three lights in a horizontal line I described earlier.

The whole incident could have only happened over a couple of minutes, maybe less.

The lights seemed to fade away, except one which I saw go behind some houses and I followed it a short way down the street on foot before it also disappeared.

The incident happened around 9.20pm today (Saturday 11 April, 2009).

I live in a village called **Section 40** which is in Chesterfield, Derbyshire.

I would be interested in knowing if anyone else saw what I have described and if any explanation can be given.

Thank you
