U.F.O's.

What They Really Are.

Scientists and leaders of different religions have always led us to believe that we are Gods gift to the Universe. Why should this be so. Eggs in a beehive may think the same way, or dolphins in the sea but are not intelligent enough to realise that there is a higher form of life than them, namely Humans. Also we humans are not intelligent enough to realise that there is a more advanced form of life than us living on or around the Earth. All that we see is the U.F.O. phenomena that we cannot believe or understand. The Ministry of Defense believe that there is something in the air but they always state that "there is no threat to the defence of the realm". Why should there be. We would not think of inventing ponds of alligators and showing them how to behave. It would be very unwise.

The phenomena is nothing new. There have been reports for thousands of years referred to as chariots of fire, angels of the Lord and guiding lights. The Ancient Israelites were said to have been guided through the desert by a pillar of fire by night and a cloud by day. They are still watching us

... to this day. In recent years there have been reports of
 crash landings and aliens taken prisoner. The beings referred to
 are of a higher intelligence. They do not crash land and be taken
 prisoner, so we can forget these fairytales.

One of my own experiences is that I was
 traveling over Portugal in an aircraft when a woman sat next to me.
 She continually said, 'Look down under the aircraft there are lots
 of those flying saucer things'. I then stood up and looked through
 the window and less than 300m below was a flying saucer like
 object the colour of stainless steel or dark grey. It was about
 50cm in diameter and keeping pace with the aircraft. There is
 then no doubt at all that we are being observed by a higher form
 of existence.
