Subject: Sighting

Hi, I'm not sure that these were UFOs, but last night on 7 February 2009 I saw 2 strange lights in the sky over Basingstoke in Hampshire.

At 11.10pm my partner and I noticed a very bright orange light travelling very fast from North to South East. It was too large and bright to be a plane, it was in view for approx 1 minute then disappeared behind a cloud. We could notice no noise or tail.

At 12.10am on 8 February I noticed what appeared to be an extremely bright, white star, where the orange light had originated. The star seemed to fall out of the sky, towards the ground very quickly. It disappeared within seconds.

If you happen to know what these lights were and could let me know, I would appreciate it.

Kind regards
