Section 40

Just to confirm as requested our conversation of this afternoon.

Section 40 of Wroughton (Tel No **Section 40**) telephoned the RAF Lyneham ATC Supervisor on Monday, 15 Jun 09 to ask whether we had had any unusual aircraft in the vicinity of Wroughton between 1930 and 200hrs (local) the previous evening (14 Jun 09). I told him that nothing had been seen by the Lyneham controllers and we had had no reports of anything unusual. He told me that he had seen black, disc-shaped objects, 50ft in diameter with lights shining from beneath them hovering over crop circles near Barbury Castle (near Wroughton, just south of Junction 15 of the M4). The discs cast shadows beneath them and were captured on two separate video cameras. He asked me to let him know if we discovered anything about the objects.

I hope that this is of interest to you.

Regards

Section 40
